                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 19, Application US/08540406

Patent No. 5837538

GENERAL INFORMATION

APPLICANT: SCOTT, MATHEW P

APPLICANT: OFONSON, ROMALD L

TITLE OF INVENTION: Patched Genes and their Use

NUMBER OF SEQUENCES: 19

CORRESPONDENCE ADDRESS:

ADDRESSEE: Flehr, Hobbach, Test, Albritton & Heri

STREET: Four Embarcadero Center, Suite 3400
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ZIP: 94111

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 19

US-09-909-280A-2

Sequence 2, Application US/09909280A

Patent No. 6605700

GENERAL INFORMATION:

APPLICANT: BUMCroft, David A.

ITLE OF INVENTION: THERETO

TITLE OF INVENTION: THERETO

CURRENT FILING DATE: 2001-07-19

PRIOR APPLICATION NUMBER: US/09/909, 280A

CURRENT FILING DATE: 2001-07-19

PRIOR FILING DATE: 1998-12-08

PRIOR FILING DATE: 1998-12-08

PRIOR FILING DATE: 1997-12-08

NUMBER OF SEQ ID NOS: 6
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ATG 1203
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ATG 1203
